

Keep your cool

Take your favourite hot or cold beverages with you on the go in these convenient thermal mugs or flasks.

The insulated mugs keep your drinks hot or cold for up to 6 hours, thanks to the stainless steel construction. When you feel like having a sip, just use the push-to-drink system to quench your thirst. The double-walled construction of the thermal flasks helps keeping your drinks hot or cold. Use the same push-to-drink system to safely pour the liquid in the cover, which doubles as a drinking cup.
